

INTRA FUEL

ENDURANCE & MUSCLE RECOVERY FUEL

This is INTRA-FUEL, a unique amino and carbohydrate recovery fuel for athletes who perform at the highest level. INTRA-FUEL uses Highly Branched Cyclic Dextrin (Cluster Dextrin®) carbohydrates with a specific blend of **Branch Chain Amino Acids, Vitamins and Minerals**, to aid in recovery†, and support the immune system during and after intense physical exercise‡ such as competitive endurance activities.

Cyclic Dextrins are highly soluble and slow releasing carbohydrates delivering bioavailable carbohydrates, a requirement to replace muscle glycogen during and after exercise‡. This unique formula contains carbohydrates which have a **fast gastric emptying time** due to low osmolality, which may be beneficial with carbohydrate intake around times of exercise. Each serving also contains a select blend of minerals including magnesium, which contributes to **electrolyte balance**.

The key ingredients in INTRA-FUEL used pre, intra and post exercise may be beneficial to both male and female athletes who participate in intense exercise and endurance sports. Especially those who need to improve **muscle recovery** from glycogen depleting exercise‡, whilst also contributing to protein metabolism and **supporting the immune system**‡†. Essential requirements for optimal performance.

- **With BCAAs, Glutamine, Citrulline & Electrolytes**
- **Supports Muscle Recovery During & After Intense Exercise**†
- **Supports Electrolyte Balance^o & Normal Muscle Function^{oΔ}**
- **Contributes to Carbohydrate, Protein & Glycogen Metabolism^{*A}**
- **Supports Immune System Impaired from Intense Exercise**†

^oMagnesium contributes to electrolyte balance. ^{oΔ}Magnesium contributes to normal muscle function. ^{*}Zinc contributes to normal carbohydrate metabolism. ^AVitamin C contributes to maintain the normal function of the immune system during and after intense physical exercise (200mg/day)(200mg/d in addition to the recommended daily intake of Vitamin C). ^ΔVitamin B6 contributes to normal protein and glycogen metabolism. †Carbohydrates (CHOs) contribute to recovery of normal muscle function after intensive/ long-lasting exercise leading to muscle fatigue & depletion of muscle glycogen. Consume 4g per kg/bwt of CHOs from all sources within 4-6 hrs post-exercise to achieve claimed effects.

INTRA FUEL

ENDURANCE & MUSCLE RECOVERY FUEL

THE INGREDIENTS IN INTRA-FUEL HELP SUPPORT HEALTHY:

MUSCLE RECOVERY[†]
PROTEIN & GLYCOGEN METABOLISM^{*A}
WITH BCAA & CLUSTER DEXTRIN[®]

908g

FRUIT PUNCH FLAVOUR

RECOMMENDED USE: Use 1 scoop (40g) with 400-500ml of water. Start drinking immediately prior to sport or exercise and consume remaining for duration of activity. For more intense exercise and endurance sports use 2 scoops (80g) with 800ml of water or as desired for taste.

INGREDIENTS: Cluster Dextrin (Waxy Corn Starch), Instantised Branch Chain Amino Acids (L-Leucine, L-Isoleucine, L-Valine, Emulsifier: Soya Lecithin), L-Citrulline, L-Glutamine, Flavouring, Trisodium Citrate, Sodium Chloride, Anticaking Agent (Silicon Dioxide), Colour (Beetroot Red), Vitamin C (Ascorbic Acid), Magnesium (Magnesium Citrate), Vitamin B5 (Calcium D-Pantothenate), Vitamin B6 (Pyridoxine Hydrochloride), Zinc (Zinc Gluconate), Sweetener (Sucralose).

ALLERGY ADVICE: For Allergens See Ingredients in Bold
 Suitable for Vegetarians. Gluten Free.
 Contents sold by weight, not volume. Setting may occur.

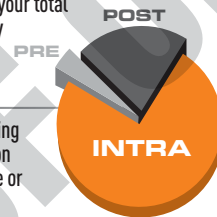

Do not exceed recommended intake.
 Do not use as a substitute for a varied and balanced diet and a healthy lifestyle.
 Store in a cool, dry place. KEEP OUT OF REACH OF CHILDREN.

HOW TO USE INTRA-FUEL

PRE Choose drink volume based on personal requirement. Start to consume INTRA-FUEL five minutes immediately prior to exercise.

INTRA Consume up to 3/4 of your total drink sipping regularly throughout exercise or sporting activity.

POST Consume your remaining drink immediately upon completion of exercise or sporting activity.
